

Shape Up the Future with Filtration & Separation: Clean Environment

**1st International Annual Conference
Hanyang University, Erica Campus
Ansan, Korea**

February 26-28, 2018

TOPICS INCLUDE:

- Air Filtration
- Indoor Air Quality
- Industrial Air/Gas Cleaning
- Cabin Air
- Room Air Purifiers
- Waste Gas Cleaning
- Gas Phase Filtration
- Filtration and Separation Fundamentals
- Filtration and Separation in Energy
- Gas/Liquid Separations
- Liquid/Liquid Separations
- Solid/Liquid Filtration and Pretreatment
- Membranes
- Water Filtration
- Nanotechnology for Filtration and Separation
- Raw Materials and Media Technology
- Modeling and Simulation
- Measurement/Test Methods
- New or Alternative Technologies

The KFS in partnership with Hanyang University is pleased to announce the 1st International Conference on Clean Environment "Shape Up the Future with Filtration & Separation – Clean Environment". The world's welfare depends largely on the role of Filtration and Separation technology in improving the health of our planet. The meeting will take place over 3 days on February 26-28, 2018 at the Erica Campus of Hanyang University

The meeting will bring together scientists, engineers, marketing and sales individuals, as well as industry representatives to promote collaboration among universities, government agencies, industry, and professional societies in the field of Filtration and Separation, and to network among them. The conference will include presentations on the latest developments, review papers, and showcase company products in Filtration and Separation area.

Invited speakers are currently being organized. We are soliciting scientific contributions to this meeting that can take the form of oral presentations (20 minute presentation + 5 minute for discussion) or showcase company product presentation (8 minutes) or posters. Thus, we are encouraging a broad range of participation, including early career scientists, engineers, marketing and sales individuals, industry representatives and students.
